

Enhanced Analysis Through Integrating CICS and Other Types of SMF Data

Virtual CICS User Group – January 23, 2024 Todd Havekost – Senior Performance Consultant

Integrating CICS & Other Types of SMF Data

- With WLM goal data (72.3)
- CICS / Db2 / MQ topology views
- With Db2 accounting data (101)
- With MQ accounting data (116)
- With z/OS Connect data (123)

Enhanced Capabilities for Analyzing SMF Data

- Proactive identification of potential risks to availability and performance
- Common intuitive interface into data types across disciplines promotes collaborative analysis and expedites learning
- Dynamic navigation to explore data based on current view (instead of static reports)
- Context sensitive drill downs to quickly focus on desired subset of data (even with massive data volumes)
- Shared customized dynamic dashboards provide common views across organization

CICS TRANSACTIONS (TOP 20)

So You Don't Think You're An Architect?

So You Probably Aren't An Architect But The Role You Can Play Is Very Valuable

For You

- Understand what's really going on
- Especially valuable to real systems architects
- Keep up to date view of the estate
- Inform your own capacity and performance role
- Contribute to resilience discussions
 - Your job could become "Capacity, Resilience, Architecture, Performance"

For Me

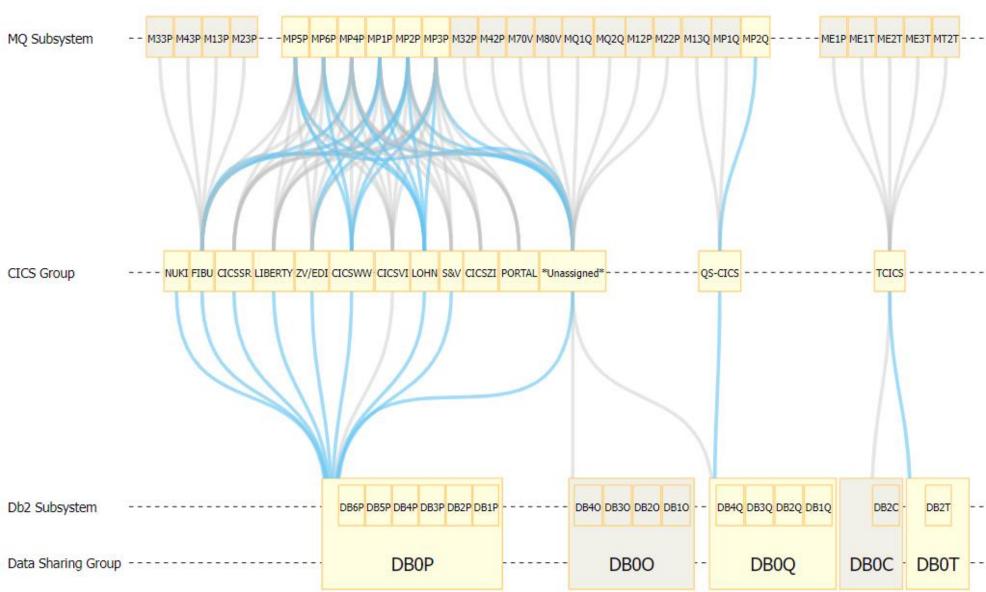

- Personally, dabbling in architecture keeps me interested
 - Not that Performance and Capacity are boring
 - It just provides another angle
- Gives me another way to find patterns among customers
- Enables me to collaborate with other disciplines

Martin Packer, IBM, GSE UK Nov. 2023

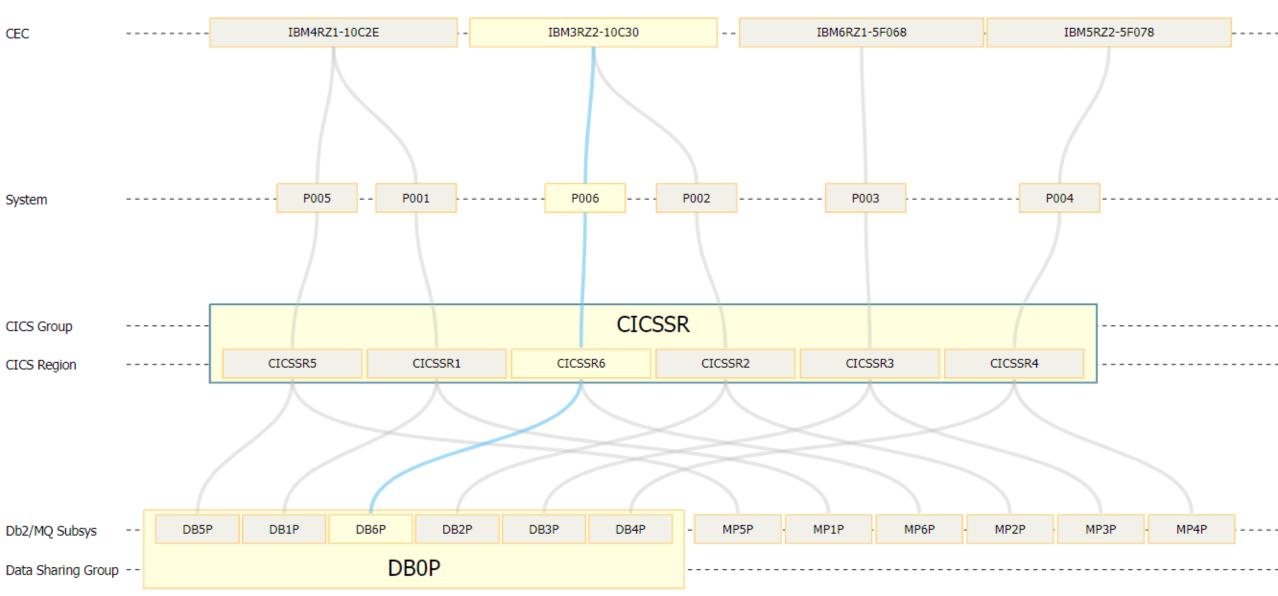

Complexity

- I'm seeing increasingly complex estates
 - Hundreds of CICS regions
 - Scores of Db2 subsystems
 - Dozens of MQ queue managers
 - Ever more diverse DDF work
 - Newer functions such as zCX, CTG, z/OS Connect
- Keeping track of it is really tough
 - Actually true for smaller estates

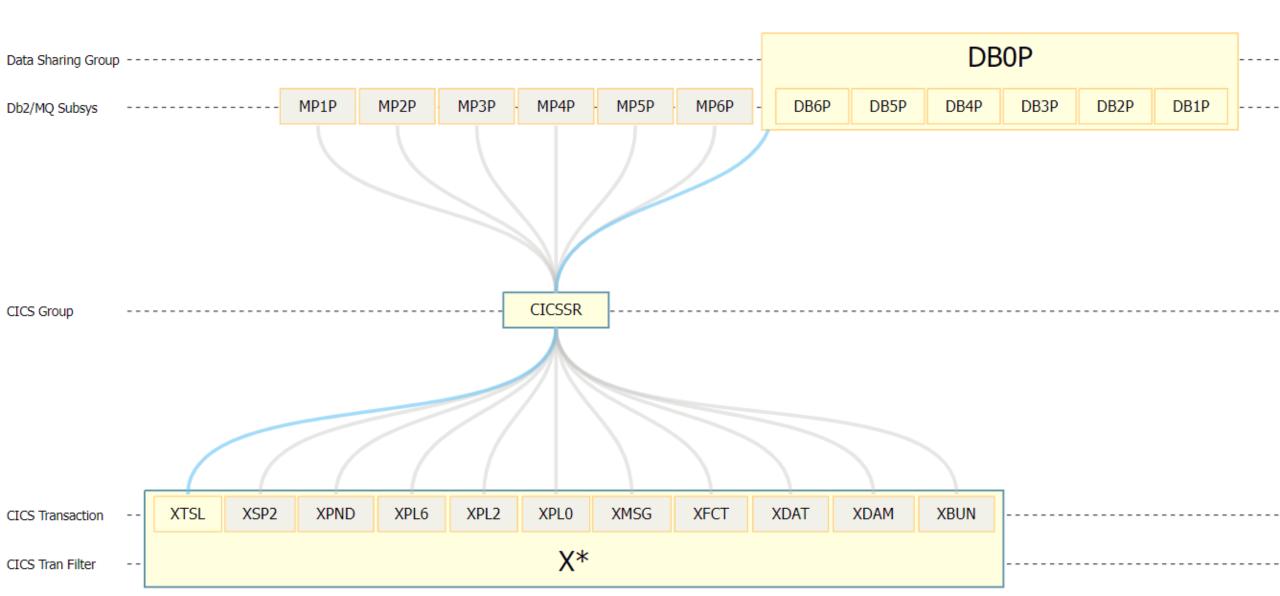

Subsystem Topology

Subsystem/System Topology

Tran/Subsystem Topology

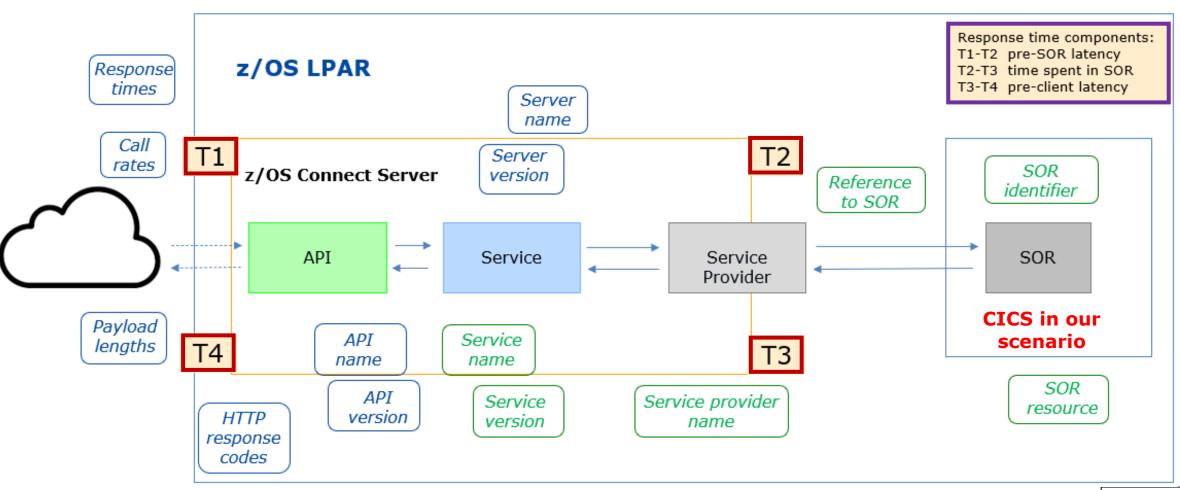

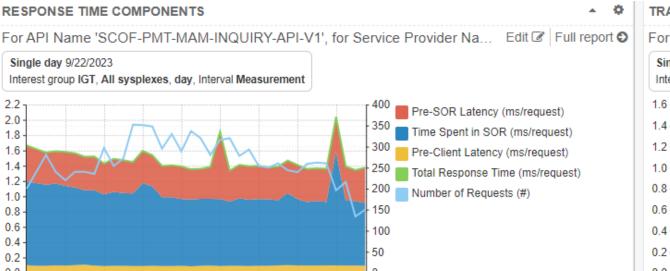

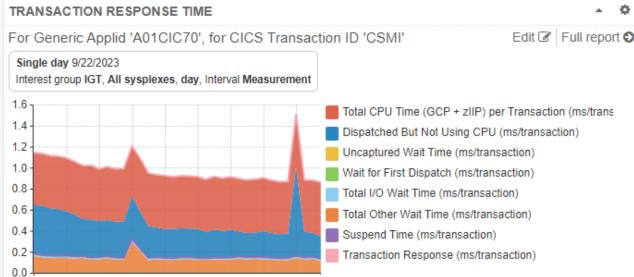

API Provider Metrics (123.1)

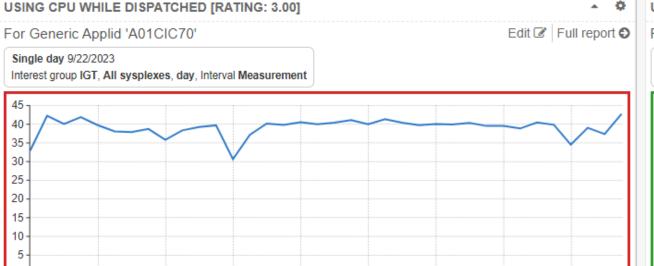

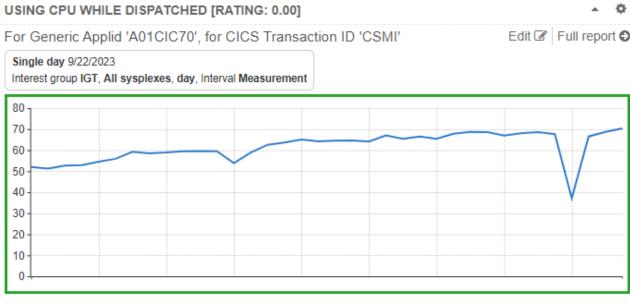

Blue = common to provider/requester

Green = provider only

Additional CICS Resources

CICS Statistics Videos

- Assessing CICS Storage Health
- Assessing CICS Transaction & Enqueue Health
- CICS Transaction Class Metrics

Should There Be a Sub-Capacity Processor Model in Your Future? –

Frank Kyne & Todd Havekost

IntelliMagic Cloud: Focus + Access to Experts

Product Infrastructure

IntelliMagic-provided product infrastructure and management

Implementation

Very fast implementation

Access to Experts

Fractional access to deep performance experts

Short-Term Services

Enables fast and cost-effective short term service engagements
